

OUR FIRST VICE-PRESIDENT - Mrs. PAUL GOODMAN

Mrs. Paul Goodman, Sarah to us, has been a member of the AHS since its earliest days. Having served the Mid-Florida Chapter in several official capacities, including a two-year term as president, she is now completing a two-year term as first vice-president of A.H.S. An accredited senior judge, she has attended most of the shows over the years --- and as an exhibitor herself she has won countless ribbons and a number of top awards.

A true amateur, she attributes her success in growing plants to "Lady Luck" and her own "Green Thumb". Hibiscus have been a "first love" with her, but her yard is filled with all kinds of flowers in profuse abundance.

Practically a native of Florida (having been transplanted from Georgia at an early age), she has spent her adult years in the state engaged in the teaching profession. A very active and busy person in her chosen career, she is well-known in educational circles. The demands and activities of her profession have been such as to throw her in constant association with people; thus, she claims, she derives a very real relaxation and pleasure from the very opposite demands of her hobby --- gardening.

Did you hear about the moron who cut a hole in the rug so he could see the floor show -- and covered it up because he didn't like the dirty cracks?

OUR SECOND VICE-PRESIDENT - Col. WILLIAM SQUIRES

Col. Wm. A. Squires, was born in Iowa, Jan. 17, 1887. He attended the University of Iowa, and graduated from the College of Dental Surgery in 1910. Two years after he graduated he entered the U. S. Army Dental Corps.

While in the service Col. Squires served in China, Philippine Islands, and the Panama Canal Zone and most parts of the U. S. except the Northwest and Northeast.

After thirty-three years of service he retired April 30, 1945, and worked for the Atomic Energy organization at Oak Ridge, Tennessee for a short time. In 1946 he entered private practice at Oak Ridge and specialized in Exodontia.

He is a transplanted Yankee since March of 1951. When asked why he located in Daytona Beach his answer is likely to be, "I understand that John D. Rockefeller spent one and a half million dollars to find the best all year round climate and finally located in the Halifax Area, so why should I spend another like amount and arrive at the same conclusion?"

He was married to Miss Alice Heath September 2nd, 1939.

He never did any gardening or work with flowers until recently when he became interested in Hibiscus. His hobby now is trying to grow bigger and better Hibiscus. He is a charter member of the Halifax Chapter of the AHS and has served the chapter two times as president.
